

Hello.

I greatly appreciate XM's localized traffic and weather updates. The reports are a convenient alternative to tuning into my local AM or FM stations and waiting through piles of commercials and sometimes inane chatter to hear their all-too-brief reports. If the National Association of Broadcasters wants me to tune into their stations, let them improve the quality of their product in the true spirit of a free market, rather than crying to Congress to stifle XM.

Sincerely,

Joe Roberts

XM subscriber since June 2002
